IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant(s): Creel, Ricky

Application No.: 10/616,640

Filed: July 10, 2003

Title: LIGHTED IMAGE DISPLAY

Attorney Docket No.: 2491.001

Group Art Unit: 3611

Examiner: Brian Green

Mail Stop AF
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

RESPONSE TO OFFICIAL ACTION DATED MAY 10, 2005

Dear Sir:

REMARKS

Each of Claims 1-18 requires a front panel comprising a transparent portion. Claims 1-18 have been rejected citing *Young*, U.S. Patent No 2,834,134, either under 35 U.S.C. §102, or 35 U.S.C. §103(a). It is the Examiner's position that *Young* has a window or opening **16** that is a transparent portion of a panel. *Young* does not teach a transparent material; the opening is just that: an opening with no material therein. It is respectfully submitted that *Young* fails to meet the limitation of having a "panel", since an opening with no material therein cannot be considered to be a "panel" under any reasonably broad reading.
